Goua Beedi

Data Scientist

gouabeedi@gmail.com | LinkedIn | GitHub | Portfolio | Paris, France

Profile

Master's student in MS2A at Sorbonne University, after an engineering degree in Statistics and Data Science from ENSAI. My experience spans applied machine learning, credit scoring, document retrieval and multi-source data analysis, with a focus on evaluation quality and the practical use of results.

Education

Sorbonne University — Paris, France
MSc in Mathematics: Statistics, Learning and Algorithms (MS2A) — *2026 – 2027*
Statistical learning, stochastic optimization, high-dimensional statistics, simulation methods.

ENSAI - French National School for Statistics and Data Science — Rennes, France
Engineering Degree in Statistics and Data Science — *2022 – 2025*
Probability, statistical inference, econometrics, machine learning, optimization, survival analysis, Markov chains.

Preparatory Classes MPSI/MP — Paris, France
Mathematics, physics and engineering sciences — *2020 – 2022*

Skills

Programming & data	Python, SQL, R, pandas, NumPy, scikit-learn, statsmodels
Machine Learning	linear models/GLMs, tree-based models, gradient boosting, classification, clustering, scoring
Statistics	statistical learning, inference, econometrics, optimization, survival analysis, time series
Tools	PostgreSQL, FastAPI, Docker, Git, ChromaDB, Digdash

Experience

FINZUU - Fintech startup — Paris, France
Data Scientist - Agricultural credit risk scoring — *2026*

- Designed a scoring engine combining field data, agricultural reference data and explainable indicators.
- Estimated production, income, agricultural risk and repayment capacity.
- Integrated consistency checks, alerts and reason codes into a FastAPI API and monitoring dashboard.

Square Management - Square Research Center — Paris, France
AI & Data Science Intern - Evaluation of document retrieval systems — *2025*

- Designed an experimental protocol comparing 189 RAG system configurations on long documents.
- Analyzed the impact of chunking, retrieval, indexing and ranking on answer quality.
- Defined relevance, source faithfulness and failure-mode indicators.
- Built a vector search component with ChromaDB, RAGAS, FastAPI and Docker.

City of Paris - Mobility Agency — Paris, France
Data Science Intern - Mobility data analysis — *2024*

- Built a pipeline combining LAPI, SIV, SIREN and external data sources.
- Performed data cleaning, quality checks and entity matching across heterogeneous sources.
- Created indicators, statistical analyses and Digdash dashboards to support business decision-making.

Projects

Credit Scoring - Banque LCL — Paris, France
Academic Machine Learning Project — *2025*

- Modeled default risk using 530k accounts and 143 variables.
- Built a scoring pipeline with feature selection, leakage control, cross-validation and stability checks.
- Compared logistic regression, Random Forest and XGBoost; assessed calibration and interpretability.

Post-Covid Care Pathway Analysis - Hôpital Européen Georges-Pompidou — Paris, France
Statistical Project — *2024*

- Analyzed longitudinal healthcare data and applied a Cox model to study hospital readmission risk.
- Interpreted statistical results in collaboration with hospital researchers.

Availability & Languages

Availability : final-year Data Science / Machine Learning internship starting April 2027.
Languages : French fluent | English professional
